Quiz #3 of Web Technologies, SP25, Jun. 4, 2025 **[10 Marks]**

Reg. ID, Name, Section _____, _____, _G1_

You can skip adding middleware and require/includes etc. Write only handler and EJS code.

Question 1: *<CLO 3> Server side web programming and database interaction.* [3+7 = 10 Marks]

Assume a POST HTTP request contains query string parameters (in headers section) along with data in packet body (in URL encoded query string form). Write a request handler that shall print total number of parameters submitted, at server console. Display submitted parameters' names using EJS template but only that were submitted in packet body.
