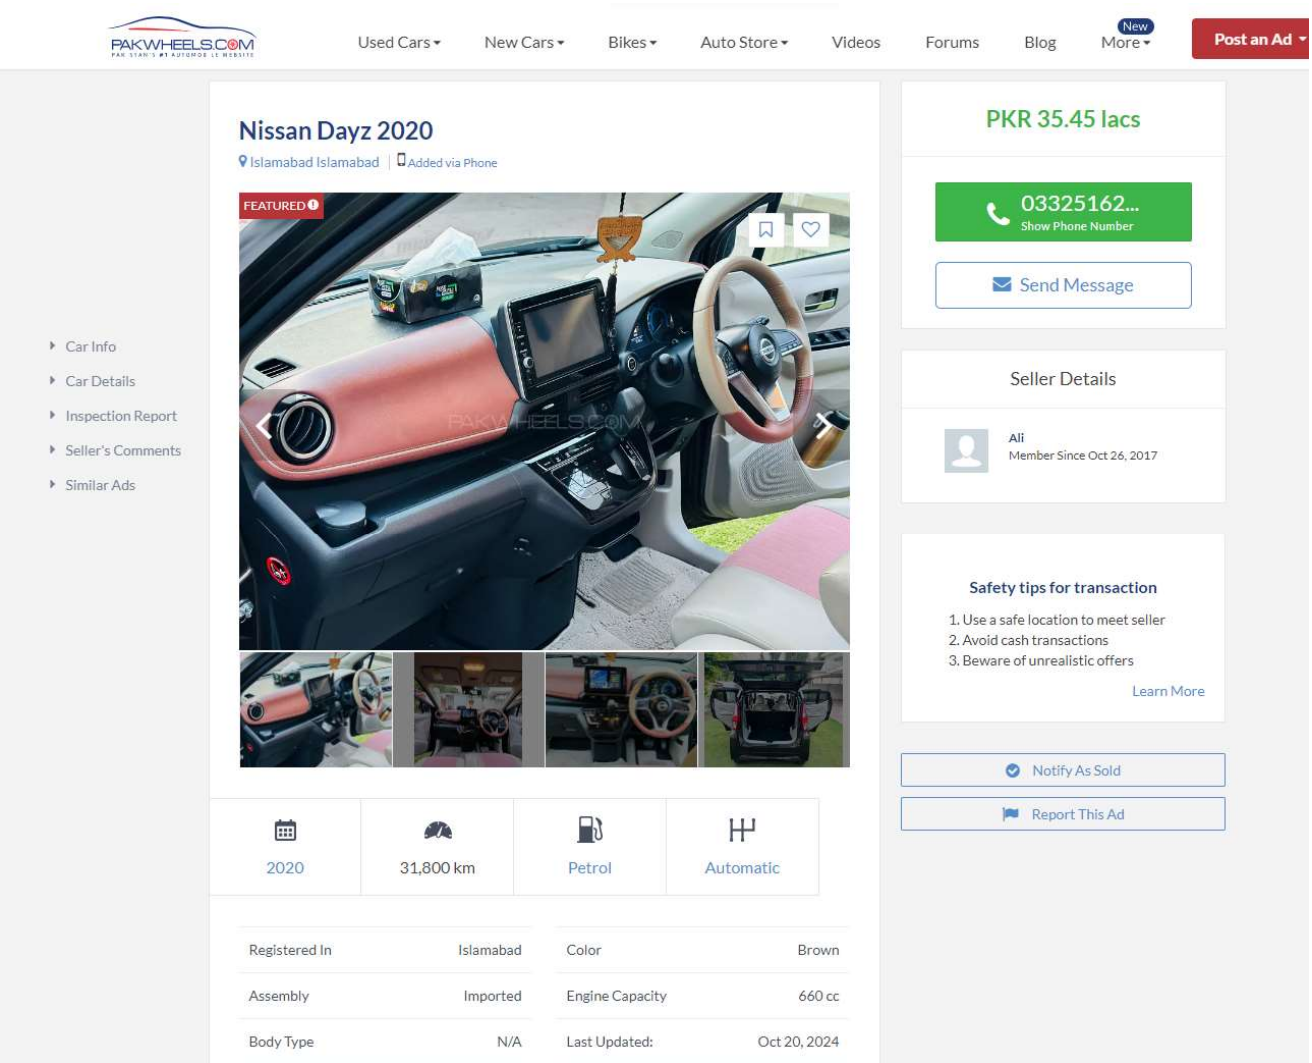
Course Instructor/s:	Asif Shahzad				Programme Name:	BSCS	
Semester:	6	Batch:	SP22	Section:	G1	Date:	Oct. 22, 2024
Time Allowed:	**2 Hours**				**Maximum Marks:**	**50**	
Student's Name:					Reg. No.		

Important Instructions / Guidelines:
For name of the html file that you upload, use format **<your registration number>-<your name>.html**

Question 1: [50 Marks]. Consider below product page of https://www.pakwheels.com/ and make a responsive clone of it. Specially take into account the below mentioned points:



1. Create top section i.e. website logo and header with links with decent spacing as displayed in image. On mobile, logo should appear at top, center aligned and header links should vertically stack.
2. Make first 2 columns as-is i.e. navigation links and product info column. Make all sections exactly as displayed; take care of margins, padding, icons, labels and product info placement. Work for only 1 breakpoint i.e. 500px. That means, 500px and below is mobile device.
3. Make 3rd column (that contains product price, seller details and safety tips) as-is. Specially taking care of spacing among elements and widgets.
4. Place favorite and save icons at top of large image. And place left/and right navigation links at top of image too (as done on given site).
5. On mobile, first column shall be hidden and remaining 2 columns shall vertically stack.
