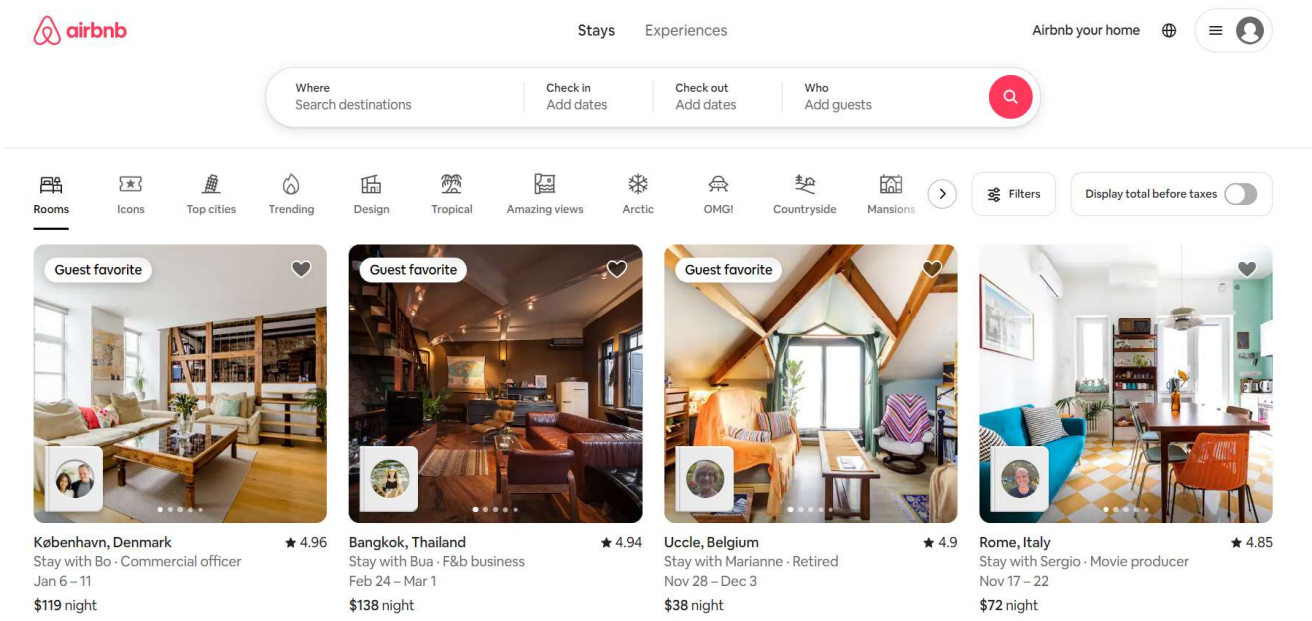
Course Instructor/s:	Asif Shahzad				Programme Name:	BSSE	
Semester:	4	Batch:	FA22	Section:	C	Date:	Oct. 21, 2024
Time Allowed:	**2 Hours**				**Maximum Marks:**	**50**	
Student's Name:					Reg. No.		

Important Instructions / Guidelines:
For name of the html file that you upload, use format **<your registration number>-<your name>.html**

Question 1: [50 Marks]. Consider below homepage of www.airbnb.com/ and make a responsive clone of it. Specially take into account the below mentioned points:



1. Website Logo on left and User Icon on right side, inside the header bar. Search Bar should come at center. You can keep the search bar, simple to just a text field but rounded and having decent padding. On mobile and desktop both, all 3 elements shall remain in single row.
2. Add icons bar (e.g. Rooms, Icons, Top Cities etc.) in such a way that on mobile, only 4 icons with labels shall come in a single row, others shall move to next row. You can work for only 1 breakpoint i.e. 500px. That means, 500px and below is mobile device.
3. Place images exactly as done on given site, corners roundness, user icon and "Guest Favorite" tags are placed on top of the image. So place at same locations properly.
4. By default, there shall be 4 (or more) listings in single row (on desktop). On mobile, display only 1 property listings per row. (treat width below 500px as mobile)
5. Content written below the image shall be as-is i.e. city and country name with ratings, in the first row where ratings is right aligned. Stay related text and rate per night stay as left aligned.
