COMSATS University Islamabad, Lahore Campus

Mid Term, Examination – Fall 2024

Course Title:	Web Technologies			Course Code:	CSC336	Credit	3(2,1)
Course Instructor/s:	Asif Shahzad			Programme Name:	BSCs		
Semester:	4	Batch:	SP22	Section:	G1, G2	Date:	Nov. 1, 2024
Time Allowed:	**1.5 Hour**			**Maximum Marks:**	**50**		
Student's Name:				Reg. No.			

Important Instructions / Guidelines:
Please implement functionality that is asked, do not do any extra work. Present your work with good UI.

Question 1 [CLO-1]

Write names of HTTP Request headers that serve the below purpose? [10 Marks]

1. Stores technical name browser, rendering engine, user OS and system architecture etc.
2. Specifies the type of data stored in payload.
3. Specifies the size of payload.
4. Stores the domain name being accessed.

Question 2 [CLO-2]

Assume this HTML:

```
<div class="row"><label>Name</label><input type="text" class="field"/></div>
<div class="row"><label>Email</label><input type="text" class="field"/></div>
```

Write CSS using selectors defined above, such that, on mobile, input fields should come below the label. But on greater screen sizes (500px+), label should be placed on left and input field on right side of its label. [10 Marks]

Question 3 [CLO-3]

Assume many CSS properties are applied on an element with id "*alpha*". And button is already created with id "*show_props*". Write JavaScript such that when the button is clicked, all CSS property names and their values should be displayed in tabular form inside an already defined empty div with id "*beta*". [15 Marks]

Question 4 [CLO-4]

Create an HTML form with two text input fields with id "css_*property_name*" and "css_*property_value*" and "*Apply*" button. When the apply button is clicked, the specified *css_property_name* and *css_property_value* should be applied on a div with id "*alpha*". [15 Marks]
