Semester:	6	Batch:	SP22-BCS	Section:	ABC (G2)	Date:	Dec. 3, 2024
Time Allowed:	**1.5 Hour**				**Maximum Marks:**	**50**	
Student's Name:					Reg. No.		

Important Instructions / Guidelines:
Please implement functionality that is asked, do not do any extra work. Present your work with good UI.

Question 1 [CLO-1]

What are 5 major differences between GET and POST HTTP Request? [10 Marks]

Question 2 [CLO-2]

Assume this HTML:

```
<div id="box"><img src="sales.png"><div id="alpha">Sales Graph></div></div>
```

Write CSS using selectors defined above, such that, div with id "alpha" should come at top of the image, at bottom left corner, overlapping the image. [10 Marks]

Question 3 [CLO-3]

Write HTML and JavaScript code to create a web page. In the <head> section of the page, add the following JavaScript object: *let user = {name:"ali", gender:"Male", subjects:["oop", "web", "db"]}*. Create a form with the following input fields: Name: A text input field. Gender: Radio buttons for "Male" and "Female". Subjects: Checkboxes for each subject. Add JavaScript to automatically fill the form with data from the user object when the page loads. Ensure the correct input fields are pre-filled with the respective values. [15 Marks]

Question 4 [CLO-4]

Assume a webpage contains two elements with IDs alpha and beta. The with ID alpha has some inline CSS properties applied. Write code to create a button, define and attach a click handler to the button, such that, when clicked, the CSS properties applied to alpha are also applied to the with ID beta. [15 Marks]
