Quiz #2 of Web Technologies, FA24, Oct. 23, 2024 **[10 Marks]**

Reg. ID, Name, Section _____, _____, _____

Question 1: Assume two text input fields and a button is defined with IDs name, value, and myBtn. Assume a JS object is also declared that is empty, named myData. Define an event handler for myBtn and bind it “onload” such that when the button is clicked, user given property name and value shall be added to myData object. And all properties names and their values of myData object should be embedded inside an already defined div having id “container”, in a tabular form, where properties names should be in first column and values should be in second column.
