All CSS and HTML should be in a single file named, <your registration number>.html

Question 1:

<CLO 4> Apply the concepts of markup & scripting languages and client-side technologies.

Consider below product page, specially take into account the mentioned points: [50 Marks]

1. Your page should look as-as from layout and spacing perspective. Content can be different. On smaller screen (below 500px), the right column should shift down.
2. At end of the page, add a text input field and a button with label "Load", when the button is clicked, update page contents (only product name, different prices, and featured image) based on entered product ID. Fetch product detail using AJAX from products.json file that shall return list of products.
