COMSATS University Islamabad, Lahore Campus

Terminal, Lab Examination – Fall 2024

Course Title:	Web Technologies			Course Code:	CSC336	Credit	3(2,1)
Course Instructor/s:	Asif Shahzad			Programme Name:	BSCS		
Semester:	6	Batch:	SP22	Section:	G1	Date:	Dec. 24, 2024
Time Allowed:	**2 Hours**			**Maximum Marks:**	**50**		
Student's Name:				Reg. No.			

Question 1: [50 Marks]

Create a web application with the following features. Use Bootstrap for tables, forms, buttons, and panels. The app should function entirely from the homepage (`http://localhost:3000/`) without requiring navigation to other URLs.

1. Create a homepage at `/` with two sections: a form to upload files and a list of uploaded files. The form should allow file upload with a category selection (e.g., Invoice, Picture, and Certificate). Use AJAX to submit the form, reset it on success, and save data in a JSON file as an array of file info objects containing details like name, size, and category. **[15 Marks]**

2. Display the list of uploaded files in a table on page load using AJAX. Each row should show an image (if applicable), file name, category, size (in KB), and links to delete or view the file. The view link should open the file in a new tab, and the table should update dynamically when a new file is uploaded. **[15 Marks]**

3. Implement a delete functionality where clicking the delete link removes the file from the server and redirects back to the homepage. **[10 Marks]**

4. Add a dropdown above the table to filter files by category. When a category is selected, use AJAX to fetch and display only files of the chosen category. **[10 Marks]**
