Terminal, Lab Examination – Fall 2024

Course Title:	Web Technologies			Course Code:	CSC336	Credit	3(2,1)
Course Instructor/s:	Asif Shahzad			Programme Name:	BSCS		
Semester:	6	Batch:	SP22	Section:	G2	Date:	Dec. 23, 2024
Time Allowed:	**2 Hours**			**Maximum Marks:**	**50**		
Student's Name:				Reg. No.			

Question 1: [50 Marks]

Create a web application that shall allow user to perform below explained operations. Make use of Bootstrap to make user interface for tables, form input controls, buttons, panels, etc. Your application should run at Port 3000 and work without requiring to enter any URL in address bar, except homepage at URL "/".

1. Make a webpage for Add Product form that shall let user input product name, price, availability status, picture and brochure. Where "name" and "price" should be text input fields. "Availability" should be radio buttons i.e. Available, Not Available. "Picture" and "Brochure" fields shall allow uploading files. Think of brochure as PDF file containing detailed product information. When form is submitted, the web app shall store the submitted data in a JSON file or in session and redirect to "/". It should be stored array of objects, where each object shall represent a product. [10 Marks]
2. The "/" URL shall display list of all products (id, name, price, availability status, picture, a link to open brochure) in tabular form with links to delete and update the product. All place Add New Product link at top of the page. [10 Marks]
3. When Delete link is clicked, that product should be deleted from the JSON file or session (whatever you used as storage) using AJAX and on successful deletion, that product row shall be deleted from table. User shall remain at same page i.e. "/" [10 Marks]
4. When Update link is clicked, open a form that shall display the current information in a pre-filled form and let user to update the product. Current image shall be displayed as 300px width. Let user change the image and brochure as well along with other fields. [10 Marks]
5. Secure the application such that Add Product, Delete and Update operations shall be performed if admin is logged in (use "test" as username and password both). Otherwise, when the links are clicked, it shall open or redirect login page with proper error message. Also provide a links to login and logout in header. [10 Marks]
