Quiz #3 of Web Technologies, FA24 G2, Dec. 2, 2024 **[10 Marks]**

Reg. ID, Name _____, _____

Question 1: Assume users.json file contains array of objects in JSON format, where each object has id, name, age, and city property. Assume two elements are defined in a web page, as follows:

```
<select id='names'><option>Select User</option></select>
<div id='data'></div>
```

Write JavaScript that should initialize 'names' option list with users' names on page load, using data defined in users.json (so you need to make AJAX call to users.json). When a particular user sis selected in list, display details of selected user in 'result' div.
