Quiz #3 of Web Technologies, SP25, Jun. 3, 2025 **[10 Marks]**

Reg. ID, Name, Section _____, _____, _G2_

You can skip adding middleware and require/includes etc. Write only handler and EJS code.

Question 1: *<CLO 3> Server side web programming and database interaction.* [3+7 = 10 Marks]

(A) Define an HTTP request handler using Express that shall handle POST request sent to '/process' endpoint. If the post request contains 'product-id' parameter in the request body, it should render/send *'found'*, otherwise it shall send *'not-found'* in response body.

(B) Define EJS template and handler for HTTP GET request sent at '/display' URL. It shall display all query string parameters' names and values in tabular form in browser using EJS template (display.ejs)
